

In the event of an electrical accident, fast intervention is essential. The panel contains all the rescue tools in a set place, making it accessible to all users in order to intervene if necessary.

COMPLETE RESCUE SET

TC107P

Dimensions: 1850 x 760 x 16 mm, Weight: 23,5 kg

Q	Description
1 x	Insulated cable cutter 24/36 kV
1 x	Wooden wall panel
1 x	Storage box for electrician's gloves
1 x	Latex insulating gloves 24/36 kV
1 x	Insulating boots
1 x	Voltage detector 5-36 Kv
1 x	Rescue stick and voltage detection. 5-36kV, 1.97m
1 x	Insulating stool 24/36 kV
1 x	First aid procedure panel

Insulating stool 24/36kV

Storage box for gloves
Latex insulating gloves

Insulated cable cutter 24/36kV

Insulating boots

First aid procedure panel

Rescue stick and voltage detection. 5-36kV, 1.97m

Idube Conductive clothing

KV-GUARD® SUIT

We offer the most complete and effective protection available for workers in live-line maintenance. The KV-GUARD® conductive clothing is a

soft Faraday cage that puts linemen at the same potential as the conductor. With clothing bonded to the conductor, the lineman can work comfortably inside the electrical field—with gloved hands at close range.

The conductive fabric leads the industry worldwide because every phase of product development and production is closely monitored by quality control. Each step of the way, production meet strict standards: from blending Nomex with the stainless steel, spinning it into yarn, to weaving it into KV-GUARD fabric, and sewing it to produce the finest conductive garment in the world.

When the garment is completed, multiple tests are performed to check for wrist cuff to wrist cuff conductivity and sleeve to ankle cuff conductivity. All data is recorded along with each suit's serial number, so the garment's continued quality and performance after years of washing and wearing, can be monitored.

Both jacket and pants are designed for maximum comfort and protection, and leave our factory guaranteed under 100 Ohms conductivity. The attached hood assures complete conductivity, accommodates hard hats, and allows for mobility and comfort. Pockets with snap closures provide safe storage for six-foot bonding tapes on each hip of the jacket. With full cut body and raglan sleeves for ease of movement, the jacket is bonded to the pants by the inside loop and tie tape. The pants have a snap fly front and are held up by adjustable suspenders. Ankles and wrists have Velcro® closures for a snug fit.

ACCESSORIES

Gloves: Are made of a fine blending of yarns similar to those used in the suits. Knit to give the dexterous fit needed for manual work, the gloves are strong and durable. Other features include: stretch knit—ambidextrous; designed with an extra long cuff to fit up over the jacket cuff, providing the bond needed for conductivity. One size fits all.

Static Belt: This 72" long extension belt has a Velcro closure wrist strap making for easy attaching and removing.

Socks: KV-GUARD® socks are jersey knit with an elastic rib calf that fits over the pant leg. The special blend of Nomex, stainless steel, cotton tery and rubber provide the comfort necessary to wear the socks for long hours. One size fits all.

Suit and Accessory Bag: This bag with durable zipper closures, made of longwearing nylon Codura®, will easily hold all KV-Guard equipment and accessories. A convenient plastic name plate window allows for personal identification.

Specifications:

- Double Needle sewing on all major seams.
- Sewn with thread of Nomex®
- 6.5oz per sq. yd. herringbone twill weave.
- Bartacked at stress points.
- Each KV-Guard suit comes in a durable, protective carrying case.
- All KV-Guard garments are completely washable by hand or in an automatic washing machine with mild detergent.
- Dry in an automatic dryer on low heat or hang on wooden hanger to dry.

Sizing	Medium	Large	X-Large
Chest <i>To fit chest size (in inches)</i>	42	48	54
Waist <i>To fit chest size (in inches)</i>	36	42	48
